Poverty Analysis

Poverty Datum Lines – March 2019

Main findings

- The Food Poverty Line (FPL) for one person in March 2019 was \$59.00.
- The Food Poverty Line (FPL) for an average of five persons per household in March 2019 was \$295.00.
- The Total Consumption Poverty Line (TCPL) for one person stood at \$175.00 in March 2019.
- The Total Consumption Poverty Line (TCPL) for an average of five persons per household stood at \$873.00 in March 2019.

Concepts and definitions

The poverty datum line (PDL) represents the cost of a given standard of living that must be attained if a person is deemed not to be poor. The food poverty datum line (FPL) represents the minimum consumption expenditure necessary to ensure that each household member can (if all expenditures were devoted to food) consume a minimum food basket representing 2 100 calories.

An individual whose total consumption expenditure does not exceed the food poverty line is deemed to be very poor. The total consumption poverty line (TCPL) which is naturally higher than the FPL was derived using 2011/12 PICES data. It was derived by computing the non-food consumption expenditures of poor households whose consumption expenditures were just equal to the FPL. The amount was added to the FPL, if an individual does not consume more than the TCPL, he or she is deemed poor. The analysis uses the per capita consumption expenditure, and an average of five persons is used based on the average size of households as established by the 2002 and 2012 Population Censuses.

Detailed results

The food poverty line (FPL) as at March 2019 stood at \$58.93. This means that the minimum needs basket cost that much per person in March 2019. This represents an increase of 2.7 percent over the February 2019 figure of \$57.38.

The March 2019 FPL for an average of five persons in Zimbabwe stood at \$294.66. This represented an increase of 2.7 percent when compared to the February 2019 figure of \$286.90.

The Total Consumption Poverty Line (TCPL) for Zimbabwe stood at \$174.59 per person in March 2019. This means that an individual required that much to purchase both non-food and food items as at March 2019 in order not to be deemed poor. This represents an increase of 5.53 percent when compared to the February 2019 figure of \$165.44.

The TCPL for an average of five persons stood at \$872.94 in March 2019. This means that an average household required that much to purchase both food and non-food items for them not to be deemed poor. This represents an increase of 5.53 percent when compared to the February 2019 figure of \$827.19.

The poverty datum lines vary by province as prices vary from place to place. The TCPL for an average household in March 2019 ranged from \$825.00 in Mashonaland East Province to \$902.00 in Matabeleland North Province. The differences are explained by differences in average prices in the provinces.

The quantities of commodities consumed at base year in the minimum needs basket which is consistent with the preferences of the poor individuals and households in Zimbabwe are fixed. The variations in the value of the basket are explained by changes in average prices.

NOTE: The relationship between the PDL and the minimum wages is given below.

- The TCPL of \$873.00 represents the total income needed for five members of the household (with all their income added together) as a minimum for them not to be deemed poor. The International Labour Organisation (ILO) is considered the guru on labour and employment issues. Its position on PDL in relation to wages and salaries is shown in Appendix 1.
