

28th October 2025

WEIGHTED CIVIL ENGINEERING MATERIALS PRICE INDEX SEPTEMBER 2025 (APRIL=100)

Weighted Civil Engineering Material Price Index

The Weighted Civil Engineering Material Price Index (CEMPI) was **121.21** in September 2025 and **121.10** in August 2025.

Month-on-month Rate of Change

The month-on-month rate of change in September 2025 was **0.1** percent, remaining constant on the August 2025 rate of **0.1** percent.

This means that prices as measured by the all-items Weighted Civil Engineering Material Price Index (CEMPI), increased at an average of 0.1 percent from August 2025 to September 2025.

The month-on-month rate of change is given by the percentage change in the index of the reference month compared with the index of the previous month.

The products that contributed to the increase in the index in September 2025 were diesel and deformed steel. The products that did not contribute significantly to the increase or decrease of the month-on-month rate of change were shutter boards, joint compound, water stops, concrete pipes, sluice valves, river sand, bitumen, asbestos pipes, cement, crushed stone, steel pipes and bricks

Year-on-Year Rate of Change

The year-on-year rate of change for the Weighted Civil Engineering Material Price Index (CEMPI) was **15.4** percent in September 2025.

This means that prices as measured by the all-items Weighted Civil Engineering Material Price Index (CEMPI), increased at an average rate of **15.4** percent from September 2024 to September 2025.

The year-on-year rate of change is given by the percentage change in the index of the reference month of the current year compared with the index of the same month in the previous year.

Methodology

The Weighted Civil Engineering Material Price Index (CEMPI) is obtained by measuring combined price changes of goods in both the USD and ZWG aggregated geometrically.
