## WEIGHTED CIVIL ENGINEERING MATERIALS PRICE INDEX FEBRUARY 2026 (APRIL=100)

### Weighted Civil Engineering Material Price Index

The Weighted Civil Engineering Material Price Index (CEMPI) was **123.90** in February 2026 and **124.03** in January 2026.

### Month-on-month Rate of Change

The month-on-month rate of change in February 2026 was **-0.1** percent, shedding 0.5 percentage points on the January 2026 rate of **0.4** percent.

This means that prices as measured by the all-items Weighted Civil Engineering Material Price Index (CEMPI), decreased at an average of 0.1 percent from January 2026 to February 2026.

*The month-on-month rate of change is given by the percentage change in the index of the reference month compared with the index of the previous month.*

The products that contributed to the increase in the index in February 2026 were deformed steel and diesel. The products that did not contribute significantly to the increase or decrease of the month-on-month rate of change were asbestos pipes, shutter boards, water stops, concrete pipes, sluice valves, bitumen, crushed stone, steel pipes and river sand. Bricks and cement contributed to the decrease of the index.

### Year-on-Year Rate of Change

The year-on-year rate of change for the Weighted Civil Engineering Material Price Index (CEMPI) was **6.3** percent in February 2026.

This means that prices as measured by the all-items Weighted Civil Engineering Material Price Index (CEMPI), increased at an average rate of **6.3** percent from February 2025 to February 2026.

*The year-on-year rate of change is given by the percentage change in the index of the reference month of the current year compared with the index of the same month in the previous year.*

### Methodology

The Weighted Civil Engineering Material Price Index (CEMPI) is obtained by measuring combined price changes of goods in both the USD and ZWG aggregated geometrically.
