WEIGHTED CIVIL ENGINEERING MATERIALS PRICE INDEX JULY 2026 (APRIL=100)

Weighted Civil Engineering Material Price Index

The Weighted Civil Engineering Material Price Index (CEMPI) was **133.84** in July 2026 and **133.18** in June 2026.

Month-on-month Rate of Change

The month-on-month rate of change in July 2026 was **0.5** percent, gaining 0.5 percentage points on the June 2026 rate of **0.0** percent.

This means that prices as measured by the all-items Weighted Civil Engineering Material Price Index (CEMPI), increased at an average rate of 0.5 percent from June 2026 to July 2026.

The month-on-month rate of change is given by the percentage change in the index of the reference month compared with the index of the previous month.

The products that contributed to the increase in the index in July 2026 were cement, crushed stone, asbestos pipes and bricks. The products that did not contribute significantly to the increase or decrease of the month-on-month rate of change were deformed steel, bitumen, steel pipes, sluice valves, water stops, shutter boards, concrete pipes, joint compound, and river sand. Diesel contributed to the decrease of the index.

Year-on-Year Rate of Change

The year-on-year rate of change for the Weighted Civil Engineering Material Price Index (CEMPI) was **10.6** percent in July 2026.

This means that prices as measured by the all-items Weighted Civil Engineering Material Price Index (CEMPI), increased at an average rate of **10.6** percent from July 2025 to July 2026.

The year-on-year rate of change is given by the percentage change in the index of the reference month of the current year compared with the index of the same month in the previous year.

Methodology

The Weighted Civil Engineering Material Price Index (CEMPI) is obtained by measuring combined price changes of goods in both the USD and ZWG aggregated geometrically.
