Data on prices were collected during the period 11th to 17th April 2025. Hence, the changes in prices in this report refer to that period of data collection.

Methodology

The Weighted Consumer Price Index (CPI) measures the combined price changes of goods and services in both the USD and ZWG aggregated geometrically.

Two separate indices were computed, that is, the USD Consumer Price Index and the ZWG Consumer Price Index. The original CPI weights were split into USD and ZWG components using linking factors. The linking factors were proportions of estimated household expenditure in USD and ZWG according to the COICOP classification. The resultant weights were then used to combine the two indices geometrically to come up with the weighted index.
