## ANNEX: EXTERNAL TRADE METHODOLOGY AND COMPILATION OF STATISTICS

### Source of Data

The main source of trade statistics is customs bills of entry. Whenever a good is imported or exported a customs bill of entry is completed pertaining to the nature of the good and the importation/exportation details involved. This is done for customs purposes. The Zimbabwe Revenue Authority (ZIMRA) uses the Automated System of Customs Data Administration (ASYCUDA), and the Zimbabwe National Statistics Agency (ZIMSTAT) receives soft copies of bills of entry with monthly details of data by port. This means that data capture is done by the customs department of ZIMRA. A file is received by email after the end of each month. Trade in electrical energy is external data collected from ZESA on a monthly basis and is imported into the main system using a special importation scheme based in Excel.

At ZIMSTAT the data is imported or loaded into the Eurotrace System. Eurotrace is a system specifically designed to produce trade statistics using ASYCUDA data. In Eurotrace, the data is stored and updated every month. The columns are 55 with records of a single product like Day, Office, Declaration type, Declaration number, Item number, Forwarding Agent, Trader, Customs procedure code, etc. The rows are records or entries for the month which on average are 90000.

### Concepts and Scope of Trade Statistics

**Domestic Exports** are goods of Zimbabwean origin, include goods produced domestically and those originally imported that have undergone a process of transformation. They are valued free on board (FOB). Excluded are goods consigned to diplomatic and other official missions.

**Re-exports:** are goods, materials or articles originally imported which are exported either in the same conditions in which they were imported or after going through minor operations like blending, packing, bottling, cleaning or sorting.

**Total Exports:** The aggregate of domestic exports of Zimbabwean origin and re-exports.

**Imports:** Goods imported into the country directly for home consumption or use and those going into customs bonded warehouses. In addition to commercial transactions, the other items included are imports of goods for which no foreign currency was involved (NCI) such as migrants effects. Imports are valued Cost Insurance and Freight (CIF).
