Table		Page
	<i>Migration</i>	
1 0	Recorded Migration through Official Ports	1
	<i>Visitors</i>	
2 0	Visitors and Returning Residents	2
	<i>Health</i>	
3 0	Disabled Persons by Major Type of Disability	3
3 1	Percentage of Weightings of Children 0-4 Years Lying below the Line (third centile)	3
3 2	Percentage of Birth Weights Less than 2.5 kg	3
3 3	Immunisation Coverage of Children under One Year	3
3 4	Health Facilities in Zimbabwe	4
3 7	Reported Aids Cases by Sex	4
3.8	The top Five Causes of Out-patient Attendances	5
	<i>Accidents</i>	
4.0	Occupational Injuries and Road Accidents	6
	<i>Crime</i>	
5.0	Crime Statistics	7
	<i>Labour Statistics</i>	
6.0	Employees and Earning by Industrial Sector	11
6 1	Employees and Earning by Urban Areas	11
6.2	Number of Employees in Agriculture and Wages paid by Sector and Quarter	11b
	<i>Consumer Prices</i>	
7.0	Consumer Price Index	12
7.1	Poverty Datum Lines	13
	<i>National Accounts</i>	
8.0	Gross Domestic Product (GDP) Income Approach (US\$)	14
8.1a	Gross Domestic Product (GDP) at Constant Prices (US\$)	15a
8.1b	Gross Domestic Product (GDP) at Current Prices (US\$)	15b
8.2a	Gross Domestic Product (GDP) Expenditure Approach at Constant Prices (US\$)	16a
8.2b	Gross Domestic Product (GDP) Expenditure Approach at Current Prices (US\$)	16b
8.2		
	<i>Balance of Payments</i>	
9 0	Balance of Payments	17
	<i>External Trade</i>	
10 0	Summary of External Trade, US\$	17
10 1	Domestic Exports Classified by Principle Countries, US\$	18
10 2	Imports Classified By Principal Countries, US\$	20
10 3	Domestic Exports Classified by HS Chapters	22
10.4	Imports Classified by HS Chapters	32
	<i>Agriculture</i>	
11 0	Summary of Sales of Principal Crops and Livestock	42
11 1	Volume of Crop Sales to/through Marketing Authorities	42
11 2	Value of Crop Sales to/through Marketing Authorities	43
11 3	Value of Livestock Slaughterings and Milk Production	43
11 4	Volume of Livestock Slaughterings and Milk Production	44
11 5	Short-term Credit Extended to Farmers	44
	<i>Mining</i>	
12 0	Mineral Production	45

	<i>Electrical Energy</i>	
13 0	Electrical Energy Produced and Distributed	47
13 1	Electrical Energy Used by Major Industrial Divisions	47
	<i>Construction</i>	
14 0	Building Material Price Index	48
	<i>Manufacturing</i>	
15 0	Volume of Manufacturing Index (VMI) 2009 - 2011	49
16 0	Principal Indicators - Gross output, Intermediate consumption and Value added classified by industrial group; CIP Zimbabwe 2009 - 2011	51
	<i>Transport</i>	
17 1	Railways Analysis of Revenue	52
17 2	Airport Traffic excluding Transit Passengers	53
	<i>Commercial Banks</i>	
18 0	Assets of Commercial Banks, US\$ Million	53
18 1	Liabilities of Commercial Banks, US\$ Million	55
18.2	Advances of Commercial Banks by Sector, US\$ Million	56
18.3	Advances of Commercial Banks by Type of Organisation, US\$ Million	57
	<i>Other Financial Institutions</i>	
19 0	Assets of Accepting Houses, US\$ Million	58
19 1	Liabilities of Accepting Houses, US\$ Million	59
19 2	Assets of Building Societies, US\$ Million	60
19.3	Liabilities of Building Societies, US\$, Million	61
	<i>Public Debt and Government Finance</i>	
20 0	Zimbabwe External Debt Outstanding by Debtor(Including all arrears but Excluding penalties) US\$ million	62
	<i>Consolidated Banking</i>	
21.0	Monetary Aggregate, US\$ Thousands	63
	<i>Interest Rates</i>	
22.0	Bank Deposit Rates (percent per annum)	64
22.1	Lending Rates (percent per annum)	64
	<i>Stock Exchange</i>	
23 0	Zimbabwe Stock Exchange Statistics	65
24.0	Selected International Exchange Rates	66
	Explanatory Notes	67

January	17	22 413	-22 396

Note: ♣ This table is known to be an incomplete record of all migration. This is because of :

(a) The omission on cross-border movements at points other than the official ports

(b) Evidence that some residents who declare that they are leaving for less than twelve months in fact stay away permanently or rather longer than a year.

Table 2.0 Visitors and Returning Residents

Period	Visitors from other countries						Residents returning from visits to other countries			
	Arrivals by Reason for Visit						Staying for less than one night included in Total	Absent for one night or more	Total

Note: [i] ^ Because of collection difficulties these figures exclude the employees of small agricultural units and small businesses in rural areas.

[ii] + The figures for the most recent quarters are provisional and are amended as necessary in the following quarter.

[iii] - Data not available

[iv] Data for formal employment in the agriculture sector used to include persons only employed in the LSCF farms. For consistency and comparability purposes the data now includes employees and earnings for A1, A2 farms as these previously constituted the LSCF.

Notes

1. M1 (Narrow Money) is defined as demand deposits in the banking system.
2. M2 is defined as M1 plus savings deposits plus less than 30 day deposits with the banking system.
3. M3 is defined as M2 plus over 30 day time deposits with the banking sector.

Explanatory Notes

Table 1.0 Recorded Migration Through Official Ports

Sources: Analysis of returns from the Department of Immigration Control relating to migration through official ports (it should be noted that other cross-border migration is not included and, as indicated below, there is evidence of understatement in the emigration figures relating to official ports).

Immigrants Include:

- 1) new residents intending to remain in Zimbabwe for at least twelve months;
- 2) temporary residents taking up employment for a limited period;
- 3) returning former residents who had declared themselves as emigrants when they left the country, and
- 4) returning former residents who had previously declared they were leaving for less than a year, but who nevertheless, had remained away for more than twelve months.

Emigrants include:

- 1) residents who, on departure, declare they are leaving for more than twelve months, and
- 2) persons who recorded themselves as visitors on arrival, but who stayed for more than twelve months.

It should be noted that from other sources there is evidence that a significant number of the emigrants leaving through the official ports are omitted from these figures. Mainly these are residents who, on departure, declare they are leaving for less than twelve months, but who do not return within a year.

Table 2.0 Visitors and Returning Residents

Source.- Analysis of returns received from the Department of Immigration

Visitors are defined as residents of other countries who visit Zimbabwe for a period not exceeding 12 months for any reason other than taking employment. These persons are classified, on arrival, by the Department of Immigration according to their reasons for visiting the country. In transit visitors are defined to include those visitors entering the country en route to another destination, and who spend less than two nights in passing through the country. The number of visitors leaving the country after a visit of less than one night is ascertained from the exit cards which are completed by or in respect of all departing visitors.

Returning residents are defined as persons normally resident in Zimbabwe, returning to this country after a visit not exceeding 12 months to other countries, who did not leave Zimbabwe as emigrants. The number of residents returning after a visit of not less than one night is again obtained from the exit cards.

Table 4.0 Road Accidents and Occupational Injuries

Source.- Zimbabwe Republic Police and the National Social Security Authority respectively

The figures of occupational injuries, which include industrial diseases other than pneumoconiosis, represent claims on the National Social Security Authority.

Because they are not covered by the workers compensation scheme injuries to the following classes of persons are excluded:

- a) domestic servants
- b) civil servants
- c) casual workers

Table 5.0 Crime Statistics

Source.- Police General Headquarters

The figures given are crimes reported to the Police for the periods shown. They are "National" total derived from reports from all stations.

For the period August 2011 to March 2012 some of the crimes under Criminal Law were reported under Miscellaneous Offence, Common Law and Law and Order Maintenance Act(other)

Table 6.0 and 6.1 Employees and their Earnings

An employee is defined as a person who works for a public or private employer for more than 30 hours per week. Working owners of private liability companies are included within this definition.

Following the above definition, self-employed persons who operate unincorporated enterprises rather than private limited liability companies are excluded.

Since 1975 the procedure, apart from the private domestic service sector has been to undertake a full postal inquiry in September each year and to supplement this inquiry with smaller surveys in the months of March, June and December; for these smaller enquiries coverage is confined to establishments with more than 10 employees. After each September inquiry the number of employees in the smaller establishments is assumed to remain static until the next full inquiry. Adjustments as necessary, are then made to that year's figures in the light of the latest September results.

The earnings figures given in Table 6.0 and 6.1 include: (a) all cash wages, salaries, allowances, commissions and bonuses; (b) the employers' contributions in respect of their employees to pension, provident and holiday funds and to medical aid societies; (c) the current account (as distinct from the capital account) costs to the employer of any food, clothing and housing provided free of charge to the employees.

Data for formal employment in the agriculture sector used to include persons only employed in the LSCF farms. For consistency and comparability purposes the data now includes employees and earnings for A1, A2 farms as these previously constituted the LSCF.

For private domestic servants, earnings are assessed twice a year through a sample survey in the six main urban areas. Details of earnings in all the other sectors of the economy are collected on a quarterly basis together with the employment data referred to earlier.

Unpublished data on further cross tabulations of employees and earnings figures is available on request from the office. The variables include sex, employment status (part time, full time, casual), area/region, industrial sector/status, income group, etc.

Table 7.0 Consumer Price Index (CPI)

The index is a Laspeyres type with 2001 as base year. It is based on a changing cost of a weighted basket comprising 428 different consumer goods and services which represent consumption by the average household in Zimbabwe. In constructing the weights, consumption of own produced goods and services was added to expenditure. In the case of owner-occupied housing the rent values of the houses were imputed. Similarly, for health services an imputed value for those services provided free by government was added to the tallied expenditure. The consumption concept, unlike the expenditure concept used in the previous series, increases the importance of food, housing and health.

Generally, the CPI relates to price levels around the 15th of every month. However there are a few important items for which prices are collected bi-annually (e.g. rent) or annually (e.g. school fees).

All CPI figures include value added tax and excise duty. Twelve (12) major group and 68 sub-group indices are produced monthly.

With effect from June 2005, the ZIMSTAT published the new Consumer Price Index (CPI) with new weights and a new classification in accordance with international guidelines. The shift to a new classification of Individual Consumption by Purpose (COICOP) has resulted in the increase in the number of sub-groups from 34 to 68 and the number of major groups has increased from 10 to 12.

The number of items in the CPI basket has also been increased from 337 to 428. As a result, the CPI has become more disaggregated. However, in the short term there would be lack of direct comparison of certain sub-indices for which monthly and annual comparison should be achieved in July 2005 and June 2006, respectively.

Due to the reclassification that has been done, some new sub-groups were created by moving individual items from one sub-group to another sub-group. For

instance, the major group “Transport and Communication” in the previous classification was split into “Transport” and “Communication” major groups under the new set up. A totally new major group called “Restaurants, Cafes and Hotels” was created.

The implementation of the COICOP classification is also part of the harmonisation project of Consumer Price Indices in different regions like the SADC region. All member states are supposed to adopt the new procedure to enable inter country comparisons of the CPI and the rate of inflation.

The indices prior to June 2005 were all re-referenced to 2001=100. In principle, these indices do not aggregate. However, the rates of inflation remain the same under different weight regimes as the relative magnitude of indices is maintained. The new weights are therefore applicable from June 2005 onwards.

Major Groups in the Consumer Price Index by weight 2001.

Major Groups	CPI (2001) (National) %
Food and non Alcoholic Beverages	31.9
Alcoholic Beverages and tobacco	4.9
Clothing and footwear	5.7
Housing, water, electricity, gas and other fuels	16.2
Furniture, household equipment and maintenance	15.1
Health	1.3
Transport	9.8
Communication	1.0
Recreation and culture	5.7
Education	2.9
Restaurants and hotels	1.5
Miscellaneous goods and services	3.9
Total	100

Table 7.1- 7.4 Poverty datum Lines

The ILO Position on PDL in relation to Wages and Salaries

The Minimum Wage-Fixing Machinery Recommendation, 1928, the Minimum Wage Fixing Machinery (Agriculture) Recommendation, 1951, and the Equal Remuneration Recommendation, 1951, provided the following guidelines for minimum wage fixing bodies:

- That the minimum wage fixing, should adopt criteria which will make systems of minimum wages both an effective instrument of social protection and an element in the strategy of economic and social development,

- that minimum wage fixing should in no way operate to the prejudice of the exercise and growth of free collective bargaining as a means of fixing wages higher than the minimum, and

The Minimum Wage Fixing Recommendation, 1970 stated the purpose of minimum wage fixing as:

- Minimum wage fixing should constitute one element in a policy designed to overcome poverty and to ensure the satisfaction of the needs of all workers and their families.
- The fundamental purpose of minimum wage fixing should be to give wage earners necessary social protection as regards minimum permissible levels of wages.

ILO Criteria for Determining the Level of Minimum Wages

In determining the level of minimum wages, account should be taken of the following criteria, amongst others:

- the needs of workers and their families;
- the general level of wages in the country;
- the cost of living and changes therein;
- social security benefits;
- the relative living standards of other social groups ;
- economic factors, including the requirements of economic development, levels of productivity and the desirability of attaining and maintaining a high level of employment.

From the above discussion, ILO recommends that the PDL should be used as a benchmark or a reference point in determining minimum wages. Although the recurrent result is that minimum wages and poverty are inversely related, one cannot always conclude that a rise in the minimum wages is the most cost effective way to reduce poverty. It is also important to note that there may be more than one breadwinner in a household, so if everyone gets the minimum wage then it means that households get far more than what the household would need.

Table 8.0 National Income

National income can be measured in three ways, viz. by using information on income, production or expenditure. In the main, the estimates are obtained from the product approach, but, using the product estimates as controls, analyses are also made by type of income and by expenditure.

Gross national income (market prices) represents the value of income accruing to the factors of production supplied by residents. It is thus the sum of incomes paid by resident producers to all factors of production (gross domestic income at factor cost), plus indirect

taxes reduced by subsidies plus income received by resident factors of production from non-residents, less income paid to non-residents factors of production.

In practice, establishments are regarded as paying out factor incomes to labour in the form of wages and salaries, and being left with a gross operating profit which is the factor income attributable to the factors of production employed, but not necessarily owned by the establishment. Part of this gross operating profit is then distributed to the owners of the factors of production in the form of investment income (interest, rent, dividends and net profit) and to other final recipients in the form of transfer income (direct taxes, pensions, bursaries, etc).

Wages and salaries include: (1) all cash wages, salaries, allowances, overtime commissions and bonuses; (2) employers' contributions to pension funds, provident funds, holiday funds and medical aid societies but exclude contributions to the Workmen's Compensation Fund; (3) the cash value of all income received in kind, i.e. housing, uniform etc; paid to or on behalf of residents and non-resident labour by enterprises, local and central government persons and private non-profit-making institution which are resident in the country. Wages and salaries paid by foreign diplomatic and consular mission (non-residents) are excluded.

Rent includes the imputed income from owner-occupied dwellings and the actual payments to both private renters of residential buildings and to Government in its capacity as owner of buildings. The rental income is recorded before deduction of costs and depreciation.

Gross operating profit is estimated before receipt or payment of property income (rent, other than that on residential buildings) and is expressed gross of depreciation.

Unincorporated enterprises' gross operating profit is the income in cash and kind actually received by individual employers and persons working on their own account from the total entrepreneurial income of their enterprises plus income from property.

Table 8.1 Gross Domestic Product at Factor Cost by Industry of Origin

Gross domestic product at factor cost represents the total value at factor cost of the goods and services produced within the country counted without duplication and before providing for depreciation. It is therefore essentially the sum of the values added at each stage of production.

Table 8.2 Expenditure on the Gross National Product

This table gives the final uses of gross domestic product and gross national product at market prices. The latter is derived by adjusting gross domestic product for net factor incomes (receipts less payments) from abroad.

Private consumption expenditure represents consumption by person in their capacity as final consumers. The details are to some extent, derived as residual after the allocation of supply to the other components of demand. It includes imputed rentals for owner-occupied dwellings but not expenditure on new dwellings.

What is wanted as a component of final uses gross domestic product is final consumption of resident households. However, what can be directly estimated is expenditure in the domestic market. To obtain final consumption expenditure of resident households, expenditure in domestic market is adjusted for net external expenditure (expenditure less receipts) on passenger fares, holiday travel, amount spent by visitors, foreign exchange bought from travellers and no currency involved imports.

Net government current expenditure relates to expenditure departments on goods and services netted for fees, sales and recoveries. All expenditure on defence is treated as current expenditure, except identifiable capital expenditure on airfields also used also used for civilian purposes and family residential dwellings.

Gross fixed capital formation is made up of purchases of new fixed assets (other than land) by all enterprises and central and local government less their sales of similar second hand goods. It includes work in progress of construction industry as well as expenditure on new private dwellings by individuals (net of sales).

Increase in stocks includes livestock, materials and supplies, finished goods and work in progress of all industries (other than construction).

Net exports of goods and services (exports less imports)-Exports include sales of merchandise and services as well as direct purchases in Zimbabwe made by visitors, travellers and foreign governments. Imports include purchases of merchandise and services as well as direct purchases made by resident household and government on current account abroad. Net factor income from abroad-comprise wages and salaries and entrepreneurial income received from less similar income paid abroad by residents.

Table 9.0 Balance of Payments

The objectives of the Balance of Payments Account is to record and identify transactions between residents and non-residents. The account is designed to indicate:

- a) Flows of resources
- b) Changes in foreign financial assets and liabilities
- c) Transfer payments i.e. payments flowing either way without a quid pro quo.

Conceptually each transaction involves a debit and credit entry. However, these are not explicit or accurate. Timing variations may cause transactions not to match;

exchange variations may also affect the balance. To offset these and other variations, errors and omissions are included as a balancing item against such discrepancies. The account is divided into a current account covering goods, services and transfers and a capital account covering public and private capital flows. The resulting balance is financed by official financing which may involve borrowing for this specific purpose.

Table 10.0 Summary of External Trade

Figures for domestic exports, re-exports and imports (including the parcel post trade are in the main compiled from customs bills of entry completed by exporters and importers. For electricity a special monthly return is obtained from ZESA showing trade in the commodity. Gold sales are sales of gold by the Reserve Bank to monetary authorities abroad. Corrections for any previous month's figures are made in the current month.

Domestic exports, that is, goods of Zimbabwean origin, include goods produced domestically and those originally imported that have under-gone a process of transformation. They are valued "Free-on-rail" (F.O.R) at the point of despatch. Excluded are goods consigned to diplomatic and other official missions, cinematograph films on lease tourists" effects and fuel uplifts and stores purchased by foreign aircraft.

Re-exports are also valued "Free-on-board" (F.O.B) at point of despatch. These consists of goods previously imported and are now being exported in essentially the same physical condition as when they were originally imported and of goods previously imported and entered into customs bonded warehouses.

Imports include goods imported into the country directly for home consumption or use and those going into customs bonded warehouses. Returned exports are also included as re-imports. Imports are valued cost insurance and freight (C.I.F) beginning with 1990 whereas they were valued Free on Board (F.O.B) previously.

Table 10.1 and 10.2 Domestic Exports/ Imports by Principal Countries.

The countries selected are the major trading partners in terms of value based on figures of the previous year. Table 10.1 excludes gold sales which are shown in Table 10.0. Particulars of exports are given according to the country of destination; this is the final country to which the goods are being despatched from Zimbabwe. Details of imports are given by the country of origin or production.

Table 10.3 and 10.4 Domestic Exports/Imports by HS Chapters

Zimbabwe has changed its classification of commodities from Standard International Trade Classification (SITC) to the Harmonised System of Commodity Coding and Description (HS).

- i. Cold Storage Company (CSC)
- ii. Colcom
- iii. Government Grading Centre
- iv. Quarterly Census of Registered Butcheries (Class 11)
- v. Dairy Association of Zimbabwe (DAZ)

The resulting overall average price for the grading centers was also used to value the slaughtering for CSC. Colcom average price for pig slaughtering was also used to value pig slaughtering at Government grading centres and butchers.

Table 12.0 and 12.1 Mineral Production

Source. – Chamber of Mines

Generally the value is “at mine” except for copper and nickel for which quantities and values are included after refining and hence relate to the metal content.

Table 13.0 Electrical Energy Produced and Distributed

Source.– Zimbabwe electricity Supply Authority (ZESA)

Undertakings with a capacity of less than 100 kilowatts are excluded. Imports into Zimbabwe are from Zambia, DRC, South Africa and Mozambique. Exports from Zimbabwe, other than through the grid system, are to South Africa and Namibia. The net figure is shown. The generation and distribution of electricity in Zimbabwe is the responsibility of the Zimbabwe Electricity Supply Authority (ZESA).

The difference between Zimbabwe’s input to and drawings from ZESA Grid is made up of exports to/imports from Zambia and line losses within the Zimbabwe Section of the grid system; these losses are of the order of 4 percent of the drawings from the ZESA Grid.

Table 13.1 Electrical Energy Consumed by Broad Industrial Sectors

Undertakings of less than 100 kilowatt capacity are not included.

The difference between total energy distributed and total energy consumed is made up of transformer usage and line losses, details of which are not available.

Table 14.0 Building Material Price Index

The table illustrates the price changes of building materials and the changes in the cost of building a particular three-bed roomed house (excluding labour). The later is indicated by the total materials index. The total materials index is arrived at by combining the materials indices by weights which are derived from the cost structure of the house. The weights presently being used were derived in 1968. The indices are calculated to 1968 as base then later converted to 1980 base.

The index covers two urban areas which represent the Nation. These are Harare Bulawayo. Firstly for each city are computed then combined using the ratio 75:15 = Harare : Bulawayo to get the national index.

Table 15.0 Index of Volume of Production of the Manufacturing Industries.

The indicators used for measuring changes in the volume of production are: physical quantities produced or materials used, value of sales or output deflated by a price index.

From 1990, new weights have been used and 1990 has also been used as the comparison base year.

Table 17.0 Railways

Source. – Railways Administration.

Rail services operating revenue relates solely to revenue from rail traffic.

Rail services operating expenditure is confined to the direct costs of operating the service.

Total revenue includes revenue from road motor services, catering and property rents in addition to rail services.

Total expenditure includes the costs of running all the services as well as general administration and interest charges.

Number of passengers excludes children under 7 years.

Gross tonne kilometres is the gross mass, as shown on the vehicle list, of every vehicle, “dead” engine, etc., included in the composition of trains, plus ballast wagons travelling to and from the point of working when hauled by other than ballast trains, multiplied by the distance travelled.

Net tonne kilometres relate to all public freight-paying traffic and invoiced railway stores, plus ballast en route to ballasting point when hauled on other than ballast trains. The contents of coaching stock, goods vans and “other vehicles” and ballast wagons whilst on ballast train working “in section are” excluded.

Coaching services includes revenue from passenger traffic, parcels, excess luggage, special trains and saloons.

Miscellaneous revenue includes demurrage, storage and mails.

Table 17.2 Airport Traffic

Flights in/out include all aircraft landing and taking off, viz. an aircraft which lands and takes off is reflected in the figures for flights in/out as two.

Passengers include those who embark or disembark at an airport but exclude in-transit passengers.

Freight includes good and mail lifted and set down. Other airports comprise Masvingo, Kariba, Buffalo Range, Victoria Falls, Charles Prince and Hwange National Park.

Air Zimbabwe

Source. Air Zimbabwe

Distances are measured in terms of the Great Circle distances between airports.
